## LETTER

With respect to the above referenced matter, one of the issues raised by the examiner was whether SEQ ID NO: 18 encoded a tumor rejection antigen.

To this end, attached hereto are copies of the front page and claims of U.S. Patent No. 5,405,940, which teaches both a tumor rejection antigen produced by MAGE-6, and the nucleotide sequence which encodes this.

The coding sequence is present in SEQ ID NO: 18. Attached is a marked copy of SEQ ID NO: 18 which shows this.

Also attached hereto are copies of the allowed claims in Serial No. 09/579,197. This application will issue shortly.

Respectfully submitted,

FULBRIGHT &amp; JAWORSKI, L.L.P.
